# CLOUD NFT

NFT Cloud is is a place where you can easily design, create and trade unique NFTs with the minimum expenses.
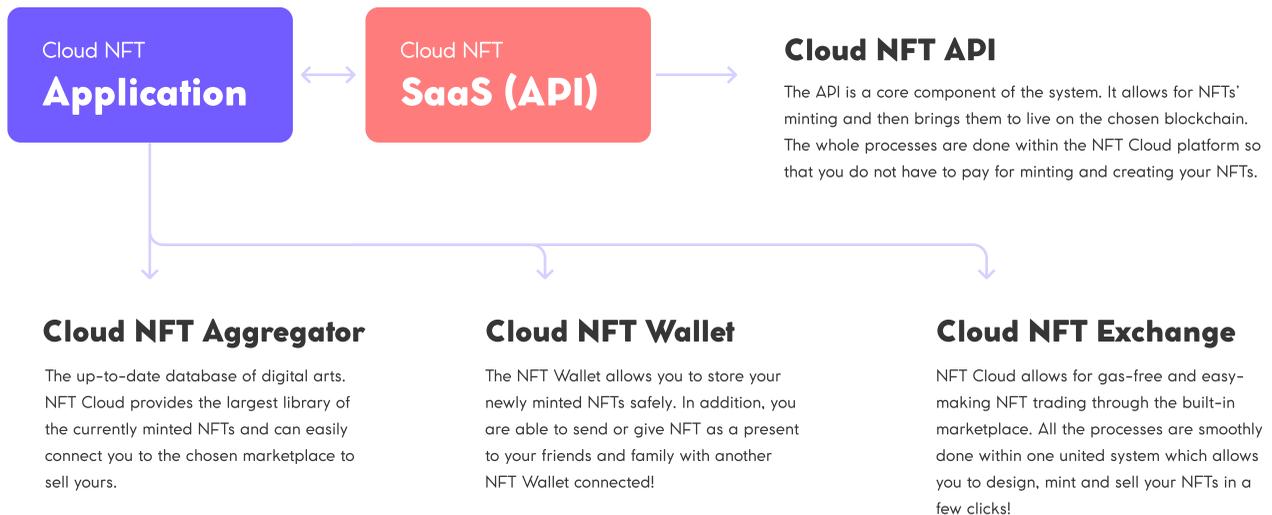

Key features

- Easy creation and management of NFTs with **zero gas fees**
- Access to **Ethereum, Solana, BSC** and other chains
- Fast non-crypto users onboarding - no blockchain/crypto knowledge required
- Compatibility with other SaaS - **flawless integration**

The Core components

NFT Cloud is aimed to create a full-fledged NFT ecosystem that will drastically change the current NFT market infrastructure. In order to achieve this, the four basic parts were designed.
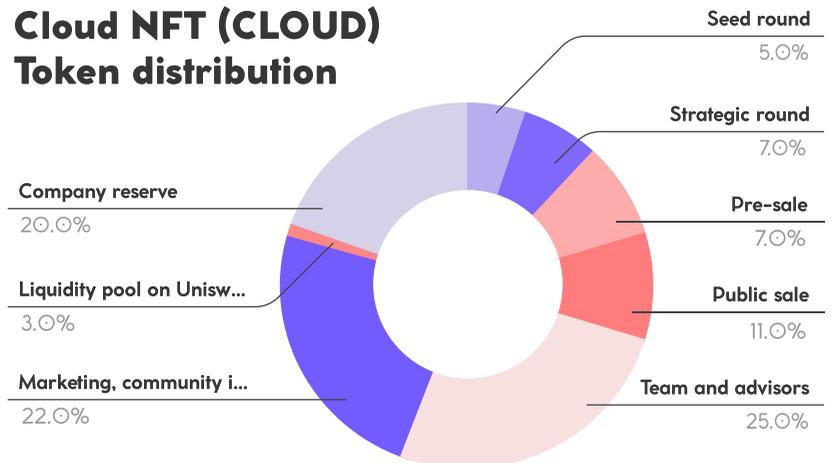

Cloud NFT Application

Cloud NFT SaaS (API)

Cloud NFT API

The API is a core component of the system. It allows for NFTs' minting and then brings them to live on the chosen blockchain. The whole processes are done within the NFT Cloud platform so that you do not have to pay for minting and creating your NFTs.

Cloud NFT Aggregator

The up-to-date database of digital arts. NFT Cloud provides the largest library of the currently minted NFTs and can easily connect you to the chosen marketplace to sell yours.

Cloud NFT Wallet

The NFT Wallet allows you to store your newly minted NFTs safely. In addition, you are able to send or give NFT as a present to your friends and family with another NFT Wallet connected!

Cloud NFT Exchange

NFT Cloud allows for gas-free and easy-making NFT trading through the built-in marketplace. All the processes are smoothly done within one united system which allows you to design, mint and sell your NFTs in a few clicks!

Roadmap

Primary Cycle

1 Market research and marketing analysis
June

2 Cloud NFT concept and strategy development
July-August

3 Initial roadmap and development framework preparation
September

4 Pre-sale round
November

Cloud NFT (CLOUD) Token distribution

- Seed round — 5.0%
- Strategic round — 7.0%
- Pre-sale — 7.0%
- Public sale — 11.0%
- Team and advisors — 25.0%
- Company reserve — 20.0%
- Liquidity pool on Unisw... — 3.0%
- Marketing, community i... — 22.0%

$CLOUD utility

- Redemption of gas fee for on-chain operations
- Facilitating inner transactions
- Staking & Yield Farming
- NFT wrapping
- Governance
- Exclusive NFT collections & NFT promotion
